Professional Summary

As a pump applications engineer at DXP, I work with customers to select and price a variety of centrifugal and positive displacement pumps to meet the needs of their application and budget. At home, I enjoy developing my skills as a programmer by writing scalable, reusable, and testable software that can range from full stack web applications to simple automated scripts.

Relevant Skills

Web	Languages	Misc
HTML, CSS, SASS	C, C++, Go	MS Office, SQL
React, Vue	Bash, Python	Linux, Windows
Nodejs, Flask	Javascript, Typescript	Docker

Work Experience

DXP Enterprises (2022-current)
- Assist customers with selection and pricing of centrifugal and positive displacement pumps.
- Communicate with customers and vendors regarding the status of pending repairs, deliveries, and invoices.
- Provide first-level phone and email support to customers experiencing pump and other equipment related failures.

Freelance Web Developer : [Arctic Express Pack](#) (2020-2022)
- Worked with clients to understand their needs regarding a new website.
- Maintained active and regular communication with clients throughout development.
- Delivered consistent updates that incorporated client feedback and suggestions.
